ABOUT US

Spinshot is a worldwide business bringing affordable and high quality tennis ball machines to the most people possible. It is our goal to provide the best equipment to players of all abilities. Improve your game at any time without the limitation of a training partner or expensive coaches.

Our Spinshot distribution company in the UK will take care of your order processing.

The Spinshot Plus-2 model combines all the features from the original Plus model but also includes the advanced features of the Player model.

Compared with the original Plus model, the Plus-2 now features the Player's Drill Maker App functionality catering for full programmability of drill settings.

Comparing the Plus-2 against the Player model, the Plus-2 model control panel features an OLED screen as Plus model, so it allows for easy access to horizontal and vertical oscillations. So the users don't have to use the App to set the oscillation drills. On the Plus-2 panel, just press the drill button and then use the + or - buttons to switch between 12 drills which is the same as the Player model.

The high-spin model is more powerful as it uses high power motors. The normal model will deliver balls slower when high spin settings applied, but the high-spin model can still shoot balls fast even in high spin settings.

Users can always adjust the settings to get low spin balls. There is no disadvantage for the high spin models. It just has a higher maximum speed and spin which is adjustable.
