

# Bed Back Rest Recliner

# About Us

## A Bed Back Rest Recliner

is a multi-function furniture that can be used for sitting up in bed . Suitable for reading, watching television or as a rest bed after sickness it relieves pressure from the back and neck. These recliners are usually adjustable as users may wish to have the right leveled chair for their comfort.

They are made from comfortable yet long lasting, and provide cushioning and support to the wearer. Some models come with extra features such as, arm rests; head rest; or even a massage option. Bed backrest recliners are ideal for the people who need more comfort and support in the places where the beds are placed.
