

BLACK ACES HEAT SHIELD

INTRODUCTION

The Black aces heat shield is a durable and functional accessory designed for shotguns, enhancing both safety and style. Made from high-quality materials, it provides a protective barrier between the barrel and the user's hand, reducing the risk of burns during extended shooting sessions. Commonly used on tactical and home-defense shotguns, the heat shield also adds a rugged, military-inspired look.

It is easy to install, fitting securely over the barrel without interfering with performance. Black Aces Tactical offers heat shields that are compatible with various shotgun models, making them a popular upgrade for firearm enthusiasts seeking both function and aesthetics.
